I enjoy great benefits from listening to XM Radio weather and traffic reports. XM Sateelite Radio provides quality and variety that are not available elsewhere, especially in rural eastern Maine where I live. Please keep in mind that I pay for these services, and it's not up to the National Association of Broadcasters to dictate what I am permitted to hear! I respectfully urge the FCC to reject the NABs petition 04-160 and support XM's ability to provide the kind of programming that I prefer.
